

# DRIP DROP DRAW

WHITEPAPER  
COMMUNITY EDITION

OPEN  
24/7

# WHAT IS DRIP DROP DRAW?

Drip Drop Draw (D<sup>3</sup> or DDD) is a **community-funded project** brought to you by Forex Shark and a few members of the R34P DAO.

Drip Drop Draw will be the **planned Layer 2 for the popular Drip Token**, where players can win big by depositing or sacrificing very little.

By simply participating regularly, players will help:

- Increase Drip locked in the Faucet,
- Reduce or stop inflation/minting,
- Deflate circulating supply,
- Increase Reservoir liquidity
- Increase their own Drip deposits

DDD, as the Layer 2 for Drip, will be **integrated into the new Drip website** and have its own menu tab.

This adds an extra layer of trust, as the website is vetted by Forex and the code is personally reviewed by him.

## IT WILL LAUNCH IN 2 PHASES

Initially a **Faucet side** and a **Reservoir side** following quickly after with totally different tokenomics and pumpamentals.

# FAUCET SIDE ENTRY

Arguably, the most innovative part of DDD is that **99% of all earnings** on the Faucet side eventually **flow into the Faucet**, with 1% going towards the Drip Marketing Wallet.

Prizes are paid out as Drip airdropped to the winning wallet, which is effectively more Drip locked into the Faucet.

Players can enter the Faucet side by either **depositing or voluntarily sacrificing** their **DRIP, BUSD or BNB** which will be pegged to the cost of \$1 BUSD per ticket. To incentivise fresh capital injections, bonus tickets are awarded to those who enter with BUSD or BNB and the highest amount of Bonus Tickets are awarded to Sacrifice entries.

Each day there will be 6 rounds of winners drawn. Each round will pay out to 7 prize divisions;

- First Prize,
- 4 Runners Up,
- a Biggest Depositor Prize,
- a Biggest Sacrificer Prize.

Each round's jackpot will comprise:

- 14% of earnings from Deposits,
- 24% earnings from Sacrifices,
- 10% of the previous round's earnings Rolled Over.

# RESERVOIR SIDE ENTRY

More details to come in the following weeks for the Reservoir side of DDD.

# FAUCET SIDE : JACKPOT AND PAYOUT ESTIMATES

It is important to note that each day's Total Jackpot will comprise a portion of earnings from both Deposits and Sacrifices. The following diagram should help understand the flow of funds more easily

**IMPORTANT:** We would like to point out that all earnings eventually end up locked into the Faucet as you can see below. This goes to show how powerful the DDD Layer 2 initiative is for Drip.

Each day's Total Jackpot will be paid out in prizes as follows :

TOTAL JACKPOT %			% OF TOTAL EARNINGS
20.00%	1st Prize Payout	which equates to	5.0%
5.00%	Runner Up 1	which equates to	1.0%
5.00%	Runner Up 2	which equates to	1.0%
5.00%	Runner Up 3	which equates to	1.0%
5.00%	Runner Up 4	which equates to	1.0%
10.00%	Biggest Depositor Prize	which equates to	2.5%
10.00%	Biggest Sacrificer Prize	which equates to	2.5%
40.00%	Rollover to next day	which equates to	10.0%
100.00%	<b>TOTAL</b>	<b>TOTAL</b>	<b>24.0%</b>

# FAUCET SIDE : JACKPOT AND PAYOUT ESTIMATES

We anticipate the jackpot will pay out thousands of Drip each day and **heavy stress testing has been performed** with many different variables and computational inputs. To illustrate how much Drip can be paid out in prizes and locked back into the Faucet daily, let us look at 3 outcomes based upon the following assumptions:

## SCENARIO 1

- At the time of writing, the price of Drip is US\$0.50.
- At the time of writing, there are currently 150,000 Active Wallets.
- A conservative **10% take-up rate** for people participating in each DDD round.
- Players only participate with the bare minimum **\$1 BUSD each**.
- For the sake of simplicity, no players voluntarily sacrifice.

Total Earnings =  $10\% \times (150,000 \times \$1) = \$15,000$  per round  
Total Converted Drip =  $\$15,000 / \$0.50 = 30,000$  Drip per round  
1st Prize payout 1,500 Drip  
Runners Up payout 300 Drip  
Biggest Depositor Prize 750 Drip  
Biggest Sacrifice Prize n/a  
Total Drip Sent to Faucet 25,500 Drip - Per Round  
**Total Drip Sent to Faucet 153,500 Drip for the day!**

## SCENARIO 2

- At the time of writing, the price of Drip is US\$0.50.
- At the time of writing, there are currently 150,000 Active Wallets.
- An ultra conservative **1% take-up rate** for people participating in each DDD round.
- However, these degen players are more aggressive and enter with **\$100 BUSD each**.
- For the sake of simplicity, no players voluntarily sacrifice.

Total Earnings =  $1\% \times (150,000 \times \$100) = \$150,000$  per round  
Total Converted Drip =  $\$150,000 / \$0.50 = 300,000$  Drip per round  
1st Prize payout 15,000 Drip  
Runners Up payout 3,000 Drip  
Biggest Depositor Prize 7,500 Drip  
Biggest Sacrifice Prize n/a  
Total Drip Sent to Faucet 255,000 Drip - Per Round  
**Total Drip Sent to Faucet 1,530,000 Drip for the day!**

# FAUCET SIDE : JACKPOT AND PAYOUT ESTIMATES

## SCENARIO 3

- At the time of writing, the price of Drip is US\$0.50.
- At the time of writing, there are currently 150,000 Active Wallets.
- An ultra conservative **2% take-up rate** for people participating in each DDD round.
- Players enter with a modest **\$10 BUSD each**.
- For the sake of simplicity, no players voluntarily sacrifice.

Total Earnings =  $2\% \times (150,000 \times \$10) = \$30,000$  per round  
Total Converted Drip =  $\$30,000 / \$0.50 = 60,000$  Drip per round  
1st Prize payout 3,000 Drip  
Runners Up payout 600 Drip  
Biggest Depositor Prize 1,500 Drip  
Biggest Sacrifice Prize n/a  
Total Drip Sent to Faucet 51,000 Drip - Per Round  
**Total Drip Sent to Faucet 306,000 Drip for the day!**

### IMPORTANT :

Whilst we feel these figures are conservative, please note that we have dumbed down assumptions for ease of calculations, but the projection modelling we have been running for stress testing involves many complex variables such as

- Supply shock price effect with increased Drip in Faucet,
- Reducing quantity of Drip as price rises,
- Whale buy-ins based on projections from historical events in Drip,
- Bad actor sell-off assumptions based upon historical events etc.

You should **note that actual daily participation will likely be a mixture of the above scenarios** and hence we can possibly assume each round's payouts to potentially be around the sum of all 3 scenarios.

# FAUCET SIDE : DEPOSITS

Depositing for tickets can be accepted in either Drip Tokens, BUSD or BNB. **Tickets are pegged to \$1 BUSD and players can enter as many times as they like.** There is an incentive of 20% Bonus Tickets provided to players entering with fresh BUSD or BNB capital. Each day's Deposit earnings will be allocated as follows:

Additionally, it is important to note :

- These figures are **after the 10% Standard Drip tax** has been charged. Drip Tax is only charged once at entry and all other movements of Drip are Whitelisted.
- **14%** of Total Earnings gets added to the **Jackpot pool** each round, even though **10%** rolls over to the **next round**, this is offset by the 10% from the previous round.
- Prizes are **paid out as an airdrop** to the winner's wallet. Airdrops are counted as deposits and therefore ALL the prize payouts are locked back into the Faucet.
- A player **MUST have an ACTIVE DRIP ACCOUNT** in order to receive any winnings or deposits. Winnings are paid only to the wallet that the winner entered with.

1.0%	Dev Fee for Marketing	24% PAID IN PRIZES	99% LOCKED INTO FAUCET
5.0%	1st Prize Payout		
1.0%	Runner Up 1		
1.0%	Runner Up 2		
1.0%	Runner Up 3		
1.0%	Runner Up 4		
2.5%	Biggest Depositor Prize		
2.5%	Biggest Sacrificer Prize		
10.0%	Rollover to next day		
75.0%	New Drip Deposit For Player		

As per the table, the Faucet Side Deposits will pay out a **fixed percentage** of each days earnings to **7 winners** :

- 1st Prize Winner gets 5%
- Runner Up 1 gets 1%
- Runner Up 2 gets 1%
- Runner Up 3 gets 1%
- Runner Up 4 gets 1%
- Biggest Depositor Prize Winner gets 2.5%
- Biggest Sacrificer Prize Winner gets 2.5%
- Each Round is open for 4 hours and 6 Rounds will be paid out each Day.

To make things fair and safe, DDD will **use CHAINLINK oracle services** to select the winners each round for true digital randomness.

A 1% dev fee will go towards a marketing wallet controlled by Forex and will be used solely for Drip marketing campaigns. With this new budget, we can now expect to see regular promotions that will help get the word of Drip out to the world.

# FAUCET SIDE : SACRIFICES

When a player buys tickets via sacrificing they will be foregoing their Drip, BUSD or BNB. BUSD and BNB will buy Drip, which will in turn be burnt to help reduce circulating supply. Each ticket will be pegged to \$1 BUSD. Sacrificing costs players an opportunity cost and hence the highest percentage of 250% (2.5x) bonus tickets are awarded to sacrifice entries. Additionally, there is still the incentive of 20% Bonus Tickets provided to players entering with fresh BUSD or BNB capital on top of the sacrifice bonus.

Each day's earnings via sacrifice will be allocated as follows :

1.0%	Dev Fee for Marketing	24% PAID IN PRIZES	99% LOCKED INTO FAUCET
5.0%	1st Prize Payout		
1.0%	Runner Up 1		
1.0%	Runner Up 2		
1.0%	Runner Up 3		
1.0%	Runner Up 4		
2.5%	Biggest Depositor Prize		
2.5%	Biggest Sacrificer Prize		
10.0%	Rollover to next day		
75.0%	New Drip Deposit For Player		

The Faucet Side Deposits will pay out **a fixed percentage** of each days earnings to **7 winners**:

- 1st Prize Winner gets 5%
- Runner Up 1 gets 1%
- Runner Up 2 gets 1%
- Runner Up 3 gets 1%
- Runner Up 4 gets 1%
- Biggest Depositor Prize Winner gets 2.5%
- Biggest Sacrificer Prize Winner gets 2.5%
- Each of the 7 prize divisions will be paid out randomly each day in 7 rounds of winnings airdrops.

Additionally, it is important to note:

- These figures are **after the 10% Standard Drip tax** has been charged. Drip Tax is only charged once at entry and all other movements of Drip are Whitelisted.
- **75%** of earnings from Sacrificing are converted to Drip and sent directly to be **burnt**, reducing total supply of Drip.
- This is money foregone and players will **NOT get 75% as a deposit** in their Drip account. However, burning is incentivised with the **HIGHEST** bonus multiplier of **250% (2.5x) bonus tickets**.
- **24%** of Total Earnings gets added to the **Jackpot pool** each round, even though 10% rolls over to the next day, this is offset by the 10% from the previous day.
- A player **MUST have an ACTIVE DRIP ACCOUNT** in order to receive any winnings or deposits. Winnings are paid only to the wallet that the winner entered with.

To make things fair and safe, DDD will **use CHAINLINK oracle services** to select the winners each round for true digital randomness. A 1% dev fee will go towards a marketing wallet controlled by Forex and will be used solely for Drip marketing campaigns.

# FAUCET SIDE : TOKENOMICS

\$1 BUSD = 1 ticket. Participants can **enter as many times** as they like.!

**IMPORTANT** : If buying with Drip, amounts will be **ROUNDED DOWN**. So if you contribute \$1.99 you will only get 1 ticket. Also, purchasing with less than \$1 BUSD will result in a failed transaction.

Option to **buy with Drip, BNB or BUSD**.

**Buying with BUSD or BNB will give 20% more bonus tickets** to incentivise fresh capital injections. Subsequently, the 20% bonus tickets disincentivise claiming and selling Drip as a player would lose 20% and be net neutral. Possibly losing another 10% moving Drip to a new wallet.

A player **MUST have an ACTIVE DRIP ACCOUNT** in order to receive any winnings or deposits. Winnings are paid only to the wallet that the winner entered with.

## Influencer Referral Rewards :

- 5% of the funds an influencer brought in from their affiliate links paid out as referral rewards in lottery tickets, not BUSD or DRIP. For example; If an influencer brings in \$10k under them, they get 500 tickets for that same day's draw.
- Influencers no longer need to "Be in it, to win it" and so referral rewards will be paid regardless of an influencer's participation.

Deposit Earnings allocated as follows :

- 1% dev fees to a wallet **ONLY** controlled by Forex to fully market Drip!
- 1st Prize - 5% of Total Earnings.
- 4 x Runners Up win 1% - 4% of Total Earnings.
- Biggest Depositor Prize - 2.5% of Total Earnings.
- Biggest Sacrifice Prize - 2.5% of Total Earnings.
- Each Round is open for 4hrs and 6 Rounds of prizes will be paid out each Day.
- 10% of Jackpot (Not Total Earnings) reserved and rolled over to the next day.
- 10% normal Drip Tax sent to Faucet. Drip Tax only charged once, all other movements are whitelisted.
- Players get to keep remaining 75% as a deposit in their Drip Account

**IMPORTANT** : 99% of ALL EARNINGS eventually ends up locked into Faucet! Prizes are airdropped, therefore locked into Faucet. Deposits are also locked into Faucet.

# SACRIFICE SIDE : TOKENOMICS

Sacrificing can also be entered with **Drip, BNB or BUSD**.

\$1 BUSD = 1 ticket. Participants can **enter as many times** as they like.

**IMPORTANT** : If buying with Drip, amounts will be **ROUNDED DOWN**. So if you contribute \$1.99 you will only get 1 ticket. Purchasing with less than \$1 BUSD will result in a failed transaction.

**Sacrificing** costs players an opportunity cost and hence **has the highest percentage of 250% (2.5x) bonus tickets** are awarded to sacrifice entries. Buying with BUSD or BNB will give 20% more bonus tickets. This 20% bonus stacks with the 250% bonus tickets incentive awarded for sacrificing!

A player **MUST have an ACTIVE DRIP ACCOUNT** in order to receive any winnings or deposits. Winnings are paid only to the wallet that the winner entered with.

Sacrifice Earnings allocated as follows :

- 1% dev fees to a wallet ONLY controlled by Forex to fully market Drip!
- 1st Prize - 5% of Total Earnings.
- 4 x Runners Up win 1% - 4% of Total Earnings.
- Biggest Depositor Prize - 2.5% of Total Earnings.
- Biggest Sacrifice Prize - 2.5% of Total Earnings.
- Each Round is open for 4 hours and 6 Rounds of prizes will be paid out each Day.
- 10% of Jackpot (Not Total Earnings) reserved and rolled over to the next day.
- 10% normal Drip Tax sent to Faucet. Drip Tax only charged once, all other movements are whitelisted.
- 75% converted to Drip and BURNT to decrease total Drip supply. The remaining 24% is airdropped as winnings and ends up in the Faucet.

## Influencer Referral Rewards :

- 5% of the funds an influencer brought in from their affiliate links paid out as referral rewards in lottery tickets, not BUSD or DRIP. For example; If an influencer brings in \$10k under them, they get 500 tickets for that same day's draw.
- Influencers no longer need to "Be in it, to win it" and so referral rewards will be paid regardless of an influencer's participation.

# ROADMAP

There are a few more additions to come to DDD and if you have a great idea you'd like to contribute, please feel free to come to the DDD Telegram chat (@dripdropdraw) and speak to an admin.

Here are the planned future additions to come to DDD:

- Early Q2 - Launch within New Drip Website / User Interface
- Q2 2023 - Certik Audit
- Q2 2023 - Drip Marketing plan to be announced and rolled out
- Q2 2023 - Reservoir Side of DDD to launch
- Late Q2 2023 - Paladin Audit - If funds in Marketing Wallet allow
- Q3 2023 - 'Teams' Update allowing teams to compete with each other and have members all earn bonus tickets if their 'Team' or 'Syndicate' wins.
- Q3 2023 - Winnings 'Gifting' system deployed

OPEN  
24/7

# CONCLUSION

The initial concept for DDD has evolved into a groundbreaking project that reflects the invaluable ideas and feedback of our talented developer team, including Bartertown Rey and Forex himself.

The tokenomics have come together seamlessly in both flow and concept. Drip Drop Draw truly embodies Forex's vision of Drip Layer 2. What's truly remarkable is that 99% of total earnings on the Faucet Deposit Side end up being locked back in the Faucet, with 75% burnt on the Sacrifice Side.

The unique features of DDD provide the potential to lock away substantial amounts of Drip from inception.

Our conservative scenario estimates suggest that a significant portion of the token supply could be locked up in a short amount of time. Consequently, this will result in supply shock which will greatly improve the Drip price.

We are thrilled about the potential impact that DDD can have not only for Drip but for the rest of the Drip and AnimalF ecosystem.

As we continue to innovate and develop our Layer 2 solution, we are confident that Drip will become a major player in the world of decentralised finance. It already contributes a significant volume of daily trade on the Binance Smart Chain.

Decentralised finance represents the future of finance, and we invite you to join us in making Drip great again.

**As the saying goes, a rising tide raises all ships, and we believe that Drip will lift the entire DeFi industry to new heights.**
